### Table of Contents

	1. Buffer Overflow Vulnerability Lab	1
	2. Retrun-to-libc Attack Lab	13
<b>General Software Security</b>	3. Format String Vulnerability Lab	23
	4. Race Condition Vulnerability Lab	43
	5. Chroot Sandbox Vulnerability Lab	49
	6. Set-UID Program Vulnerability Lab	71
	7. Web Same-Origin-Policy Exploration Lab	81
<b>Web Security</b>	8. Cross-Site Request Forgery Attack Lab	93
	9. Cross-Site Scripting Attack Lab	105
	10. SQL Injection Attack Lab	111
	11. Clickjacking Attack Lab	117
	12. TCP/IP Attack Lab	125
<b>Network Security</b>	13. DNS Pharming Attack Lab	153
	14. Packet Sniffing & Spoofing Lab	173
	15. Linux Firewall Lab	181
<b>Crypto</b>	16. Crypto Lab – Secret-Key Encryption	189
	17. Crypto Lab – One-Way Hash Function	201
<b>Misc.</b>	18. Linux Capability Exploration Lab	211

---

**Please keep the reports to yourself.  
Please never give them to students.**

For each lab, we picked the best student reports over the last few years, and put them together to produce this instructor manual. We would like to thank those students who have contributed to this manual.

This manual is meant to help instructors to prepare their labs. If falling to students' hands, it will affect the intended education objectives of the labs that we have developed over the last eight years. I really appreciate that you keep this instructor manual to yourself. Please never post this manual online; please do not give to other people, especially students. If other people ask you for a copy, please ask them to send a request email to me (wedu@syr.edu).

Thanks.

Wenliang (Kevin) Du
