

Table of Contents

Lab Environment: **SEEDUbuntu16.04** VM

Software Security	1. Buffer Overflow Vulnerability Lab	3
	2. Return-to-libc Attack Lab	21
	3. Format String Vulnerability Lab	41
	4. Race Condition Vulnerability Lab	53
	5. Environment Variable and Set-UID Lab	59
	6. Shellshock Attack Lab	73
	7. Dirty COW Attack Lab *	83
Web Security	8. Cross-Site Request Forgery Attack Lab	89
	9. Cross-Site Scripting Attack Lab	103
	10. SQL Injection Attack Lab	123
Network Security	11. Packet Sniffing & Spoofing Lab	137
	12. TCP Attack Lab	161
	13. Linux Firewall Lab	177
	14. Bypassing Firewall using VPN	199
	15. Local DNS Attack Lab	209
	16. Remote DNS Cache Poisoning Attack Lab	225
	17. Heartbleed Attack Lab *	239
	18. VPN Lab	249
Crypto	19. Secret-Key Encryption Lab	265
	20. Pseudo Random Number Generation Lab	293
	21. MD5 Collision Attack Lab	303
	22. RSA Encryption and Signature Lab	313
	23. Public-Key Infrastructure (PKI) Lab	323
	24. Man-In-The-Middle (MITM) Attack Lab	339
System Security	25. Meltdown Attack Lab	363
	26. Spectre Attack Lab	373
Mobile Security	27. Android Repackaging Attack Lab	381
	28. Android Rooting Lab	395
	29. Android ClickJacking Attack Lab	407

* The labs marked by a star only work on the SEEDUbuntu12.04 VM; they are not supported by SEEDUbuntu16.04 VM.

Several labs are not included in this manual, mostly because they have been phased out. If you do need their manuals, send me an email. If I indeed have a manual for them, I will be glad to send you a softcopy.
